Dr. Usman Fayaz
Chairman – UF Group

“Protecting the environment and support for a pollution free future.”

Mr. F. Usman Faheed
Managing Director - UF Group

“An initiative to support & increase the Electric Vehicle usage in Tamilnadu.”

For more Details follow us on

The term "electric vehicle" refers to any vehicle that uses electric motors for propulsion, while "electric car" generally refers to highway-capable automobiles powered by electricity

An electric car is an automobile that is propelled by one or more electric motors, using energy stored in rechargeable batteries.

About Electric Vehicle (EV)

Electric car A near future, booming Business,

The report says that there will not be any Fossil fuel vehicles by the year 2035. The world turns towards EV and its related business.

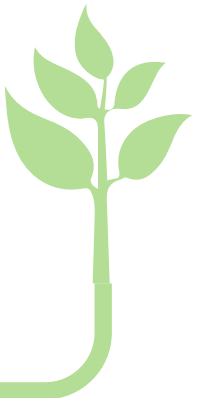

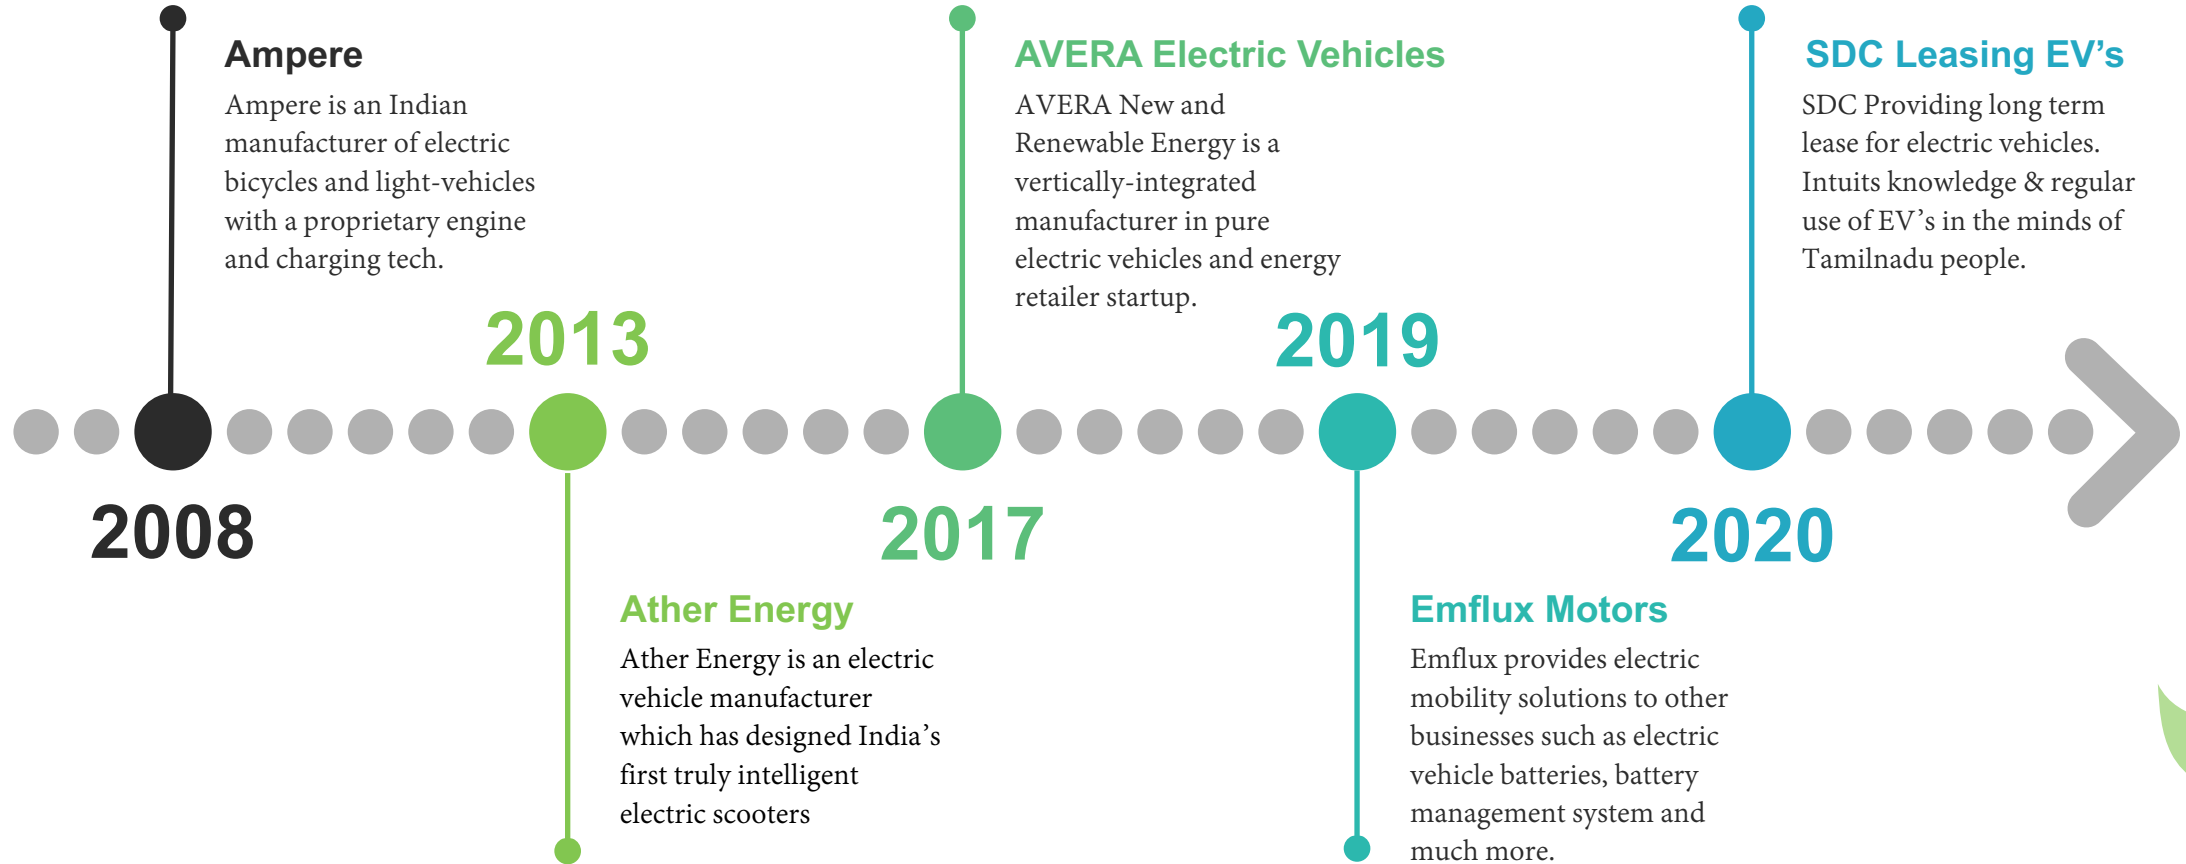

The Electric Vehicles have taken the world by a storm in the recent years, spearheaded by Tesla which now has a worldwide revenue of \$11.8 Billion

India is expected to command leadership in EV space with a projected share of 50% of new vehicles sold by 2030. So this will be the rite time to enroll into EV business

We welcome partners for the successful
Electric Vehicle Business

Revolution of Electric Vehicles

Welcome Partners

SDC Franchises Programme

Rent it today
Own it in future

Go Green

Know what?

Solar Development Co. (SDC) is yet another vision spearheaded by our own Dr. Usman Fayaz (Chairman – UF Group) and Mr. F.Usman Faheed (Managing Director-UF Group).

SDC aims to have the EV business models in a wider context in which the automotive industry is seeking to reconcile continuity and change in volatile and uncertain competitive environment.

Our approach seeks to circumscribe more widespread concerns globally on the hand, to oil shortages and climate change, and on the other hand. SDC aims at providing a sustainable electric mobility system.

Government of India recently released a notification tilted charging infrastructure of EVs to accelerate the EV adoption in the country. In accordance setting up of public charging stations (PCS) has been delicensed. Each charging station is required to have a minimum of three fast chargers. A CCS, CHAdeMO, and a Type-2, while former two will be required and operate on Direct Current (DC) Fast charging, the Type-2 would be Alternative Current(AC) Fast charging. Additionally, the charging station will also have at least two numbers of slow charging points i.e. a Bharat DC-001 of 15kW and Bharat AC-001 with 10KW power supply

Franchise

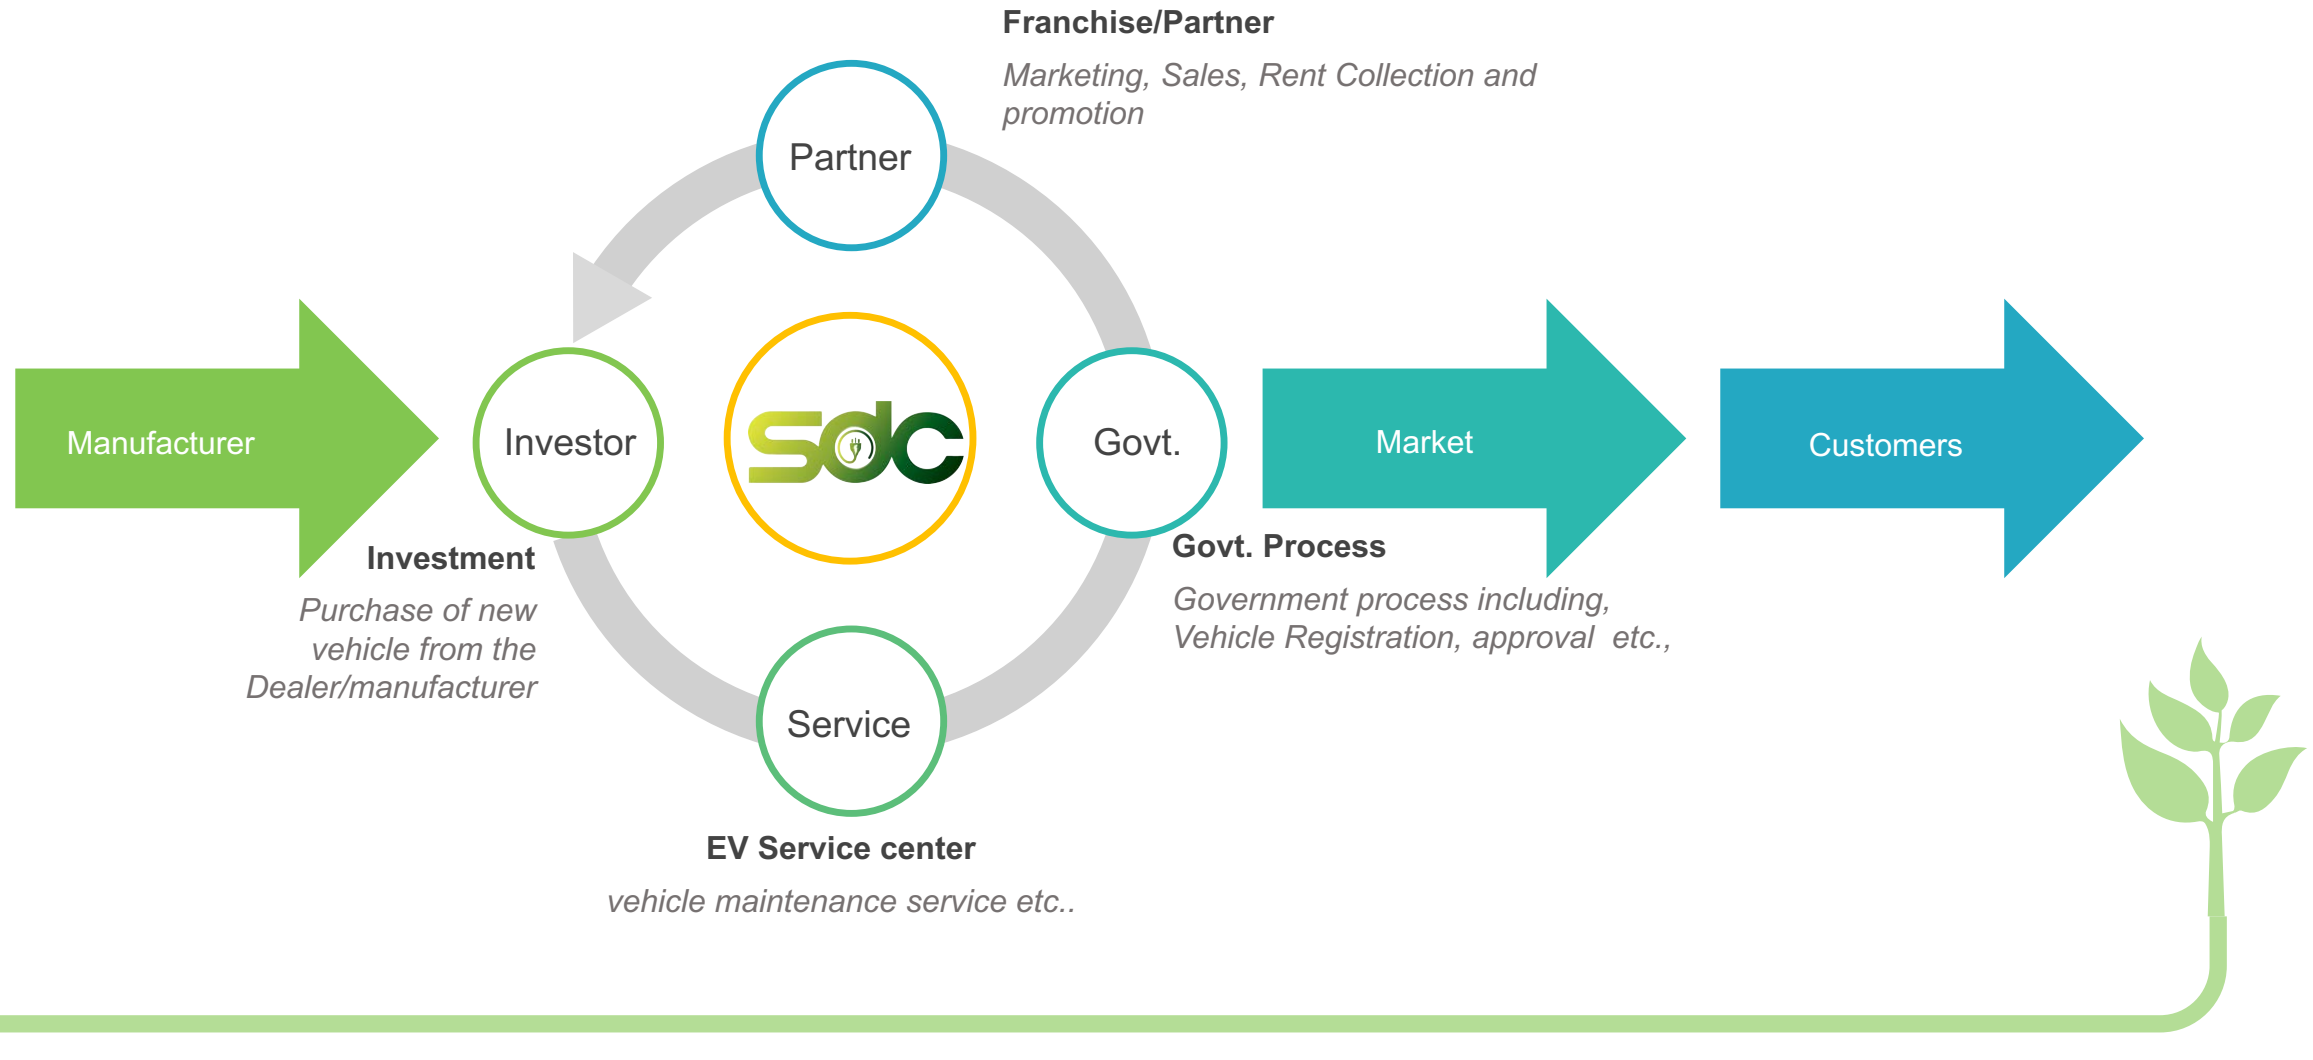

Market

Looking at the market potential, business possibilities, the way-to-win model of SDC, amalgamated with the dedication & commitment of our team, expansion has not really seemed a challenge for us despite being the most important and tough factor of success in a franchise business. The current Electric Vehicle market is more promising than ever in India. We have planned to start up with only 50 franchise's as the stage-1 and planed increase at stage-2
